

AI Resume Screening & ATS Score Report

Generated on September 22, 2026 at 00:03:54 | Powered by Antigravity NLP

Candidate: Candidate	Target Role: Senior Machine Learning Engineer
Email: Not specified	Required Experience: 5.0 years
Detected Experience: 0.0 years	Required Education: Master's Degree
Highest Education: Master's Degree	Status: Screening Complete

12.8 / 100

Composite ATS Score (Match: 12.8%)

Score Breakdown by Evaluation Pillar

Pillar	Weight	Score (out of 100)	Weighted Contribution
Keyword Matching	40%	0.0	0.00
Semantic Similarity	30%	0.0	0.00
Experience Matching	15%	25.0	3.75
Education Matching	5%	100.0	5.00
Certification Matching	10%	40.0	4.00
Total Composite Score	100%	12.8	12.75

Skill Gap Analysis

Matched Skills:	None explicitly detected
Missing Skills:	AWS, CI/CD, Deep Learning, Docker, FastAPI, Flask, Git, Hugging Face, Kubernetes, Machine Learning, Microservices, NLP, Natural Language Processing, PyTorch, Python, REST API, RESTful APIs, SQL, Scikit-Learn, Transformers
Recommended Skills:	CloudWatch, Database Indexing, GitHub Actions, Helm, IAM, Lambda

Actionable Recommendations & Resume Enhancements

Suggested Certifications to Bridge Skill Gaps:

- AWS Certified Machine Learning - Specialty or TensorFlow Developer Certificate
- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Administrator (CKA)
- Deep Learning Specialization (DeepLearning.AI)

Recommended Portfolio Projects:

- Architect a serverless event-driven workflow using AWS Lambda, S3, SQS, and DynamoDB with Terraform IaC.

- Create a GitHub Actions CI/CD pipeline featuring automated unit testing, linting, Docker image pushing, and staging deployment.
- Containerize a multi-service application with Docker Compose, implementing multi-stage builds and health checks.

Resume Optimization Tips:

- Utilize the Google 'X-Y-Z' formula for bullet points: 'Accomplished [X] as measured by [Y], by doing [Z]' (e.g., 'Reduced API latency by 35% by implementing Redis caching').
- Directly integrate top missing keywords (AWS, CI/CD, Deep Learning, Docker, FastAPI) into past job responsibilities and project descriptions rather than listing them solely in a skills summary.
- Ensure standard ATS section headers are used (e.g., 'Work Experience', 'Technical Skills', 'Education', 'Projects') to avoid misclassification by automated parsers.
- Tailor your resume summary and skill bullets to mirror the exact terminology and phrasing found in the target Job Description.
