Actionable Recommendations & Resume Enhancements

Suggested Certifications to Bridge Skill Gaps:

- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Administrator (CKA)
- Docker Certified Associate (DCA)
- Google Cloud Professional Cloud Architect

Recommended Portfolio Projects:

- Architect a serverless event-driven workflow using AWS Lambda, S3, SQS, and DynamoDB with Terraform IaC.
- Create a GitHub Actions CI/CD pipeline featuring automated unit testing, linting, Docker image pushing, and staging deployment.

- Containerize a multi-service application with Docker Compose, implementing multi-stage builds and health checks.

Resume Optimization Tips:

- Utilize the Google 'X-Y-Z' formula for bullet points: 'Accomplished [X] as measured by [Y], by doing [Z]' (e.g., 'Reduced API latency by 35% by implementing Redis caching').
- Directly integrate top missing keywords (AWS, BERT, CI/CD, ChromaDB, Docker) into past job responsibilities and project descriptions rather than listing them solely in a skills summary.
- Tailor your resume summary and skill bullets to mirror the exact terminology and phrasing found in the target Job Description.
